Hunter Windham

Hattiesburg, MS | hunter.a.windham@gmail.com | linkedin.com/in/hunterwindham

SUMMARY

Full-stack developer with 7+ years of experience building reliable, scalable web applications. Skilled in JavaScript, React, Node, and SQL, with a focus on clean architecture, performance, and maintainability. Passionate about creating elegant solutions to complex problems and continuously improving through learning and collaboration.

EXPERIENCE

TRU Solutions   Hattiesburg, MS (Remote)
Software Developer   Jan 2023 – Sep 2025
- Served as the lead developer for one application, overseeing ongoing customer requests, development, deployments, and maintenance
- Implemented observability from the ground up using Prometheus and Grafana, instrumenting API metrics and visualizing response time percentiles to monitor and improve performance
- Added customer-facing data visualizations and analytics dashboards using Apache Superset, creating tailored queries, filters, and charts based on client data requirements
- Contributed to on-call rotation, providing rapid response and root-cause analysis for production incidents to maintain platform stability

SPOT   Hattiesburg, MS (Remote)
Software Developer   Aug 2019 – Jan 2023
- Within three months, became the sole full-stack developer, leading all web and server development, maintenance, and deployments through a critical team transition
- Designed and implemented advanced business logic to support large-scale inventory operations (500K+ assets), directly contributing to landing a major enterprise client and driving revenue growth
- Refactored server-side PDF asset-matching logic, eliminating redundant processing to reduce task runtimes from hours to minutes and decrease server load
- Led a comprehensive front-end redesign/rewrite, supervising two developers in modernizing Angular components and optimizing UI/UX performance
- Collaborated with a small team of developers to rapidly build and deploy a HIPAA-compliant health screening application in just over a month, creating a new revenue source

The University of Southern Mississippi   Hattiesburg, MS
Student Software Developer   Aug 2018 – Aug 2019
- Contributed to and maintained a RESTful API, enabling efficient and reliable data exchange
- Improved and supported a responsive, mobile-first web application, ensuring an optimal user experience across multiple devices
- Collaborated in a cross-functional team to translate research requirements into software solutions
- Wrote unit and integration tests to ensure reliability, performance, and maintainability

SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL
Frameworks & Tools: Node, Express, React, Redux
DevOps: AWS (EC2, S3, RDS), Docker, Jenkins

Databases: MySQL, PostgreSQL
Monitoring & Analytics: Prometheus, Grafana, Apache Superset

EDUCATION

The University of Southern Mississippi   Hattiesburg, MS
B.S. Computer Science; Minor in Mathematics   May 2019
